SUMMARY

I am a frontend developer, with hands on experience building scalable solutions. I am always eager to learn, practice, build and grow as a developer.

PROJECTS

Audiophile E-commerce Website: Audiophile is a modern e-commerce platform for premium headphones, earphones, speakers, and audio accessories. I focused on solving real-world challenges such as creating a seamless shopping experience, optimizing performance, and ensuring responsive design. The project features intuitive navigation, reusable UI components, and a clean layout that helps users explore and compare products with ease.

Stack: React, Tailwind CSS, and React Hook

Rest Countries App: I fetched Rest Countries API to build website that provides detailed data about countries, including population, languages, capital, cities, currencies, regions, and native names. I built this to address the challenge of presenting complex data in a simple and visually appealing way. It includes features like search, filtering, and country exploration, offering users a smooth and informative experience.

Stack: React, Tailwind CSS, and API

Digital Bank Landing Page: I built a highly responsive, functional, accessible, and user-friendly landing page for an online bank. Translating design into pixel-perfect code that meets design requirements.

Stack: JavaScript, CSS, and HTML

EDUCATION

Bachelor of Science (B.Sc.), Computer Science
Ebonyi State University — 2021 - 2025
Relevant coursework: Web Development, Computer Science

SKILLS

Languages

- JavaScript(Es6+)
- CSS3
- HTML5

Frameworks

- React.js
- Tailwind CSS

Tools

- Git
- GitHub
- Vercel
